### **DETAILED ACTION**

## **Specification**

- 1. The disclosure is objected to because of the following:
  - a. The term "VCO" is not defined in the specification. For example: page 12, line 7.
  - b. The specification includes terminology which is different from that which is generally accepted in the art to which this invention pertains. For example: see the term "magnets" on page 4, line 10, also see drawings. Examiner suggests use of art-accepted terminology such as "data" or "bits".

Appropriate correction is required.

## Claim Objections

2. Claims 1 and 11 are objected to because of the following informalities: the recitation "the read path" lacks antecedent basis. Appropriate correction is required.

## Allowable Subject Matter

- 3. Claims 1, 3-11, 13-21, and 23-30 (to be renumbered as 1-27) are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 3-11, 13-21, and 23-30, claims 1, 11, and 21 teach an apparatus and method for providing write pre-compensation utilizing read signal timing, comprising a write pre-compensation circuit for using a first phase clock signal (having a first phase and being synchronized with a read signal of a read path) and a second clock signal (having a second phase at a predetermined phase difference with the first clock signal) to shift write data to achieve write data comprising a first desired pre-compensation, wherein the source of the second phase clock generates the second clock signal in response to a read phase select position signal from the read

path and a write phase select signal position signal, which is neither taught or an obvious variation of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Prior Art

Takashi et al U.S. Patent No. 5,805,024 is cited as of interest for disclosure of a write precompensation circuit utilizing a plurality of phase clocks consistent with Applicant's invention.

#### Conclusion

- 5. This application is in condition for allowance except for the following formal matters:
  - a. Objection to the specification regarding term which was not defined as discussed above.
  - b. Objection to the specification regarding terminology used which is inconsistent with art-accepted terminology as discussed above.
  - c. Objection to the claims regarding lack of antecedent basis discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Application/Control Number: 10/787,308

Art Unit: 2651

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Daniell L. Negrón whose telephone number is 571-272-7559.

The examiner can normally be reached on Monday-Friday (8:30am-5:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David R. Hudspeth can be reached on 571-272-7843. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
